

Presentation 1.2 – The Technology Value Stream

Instructions

The presentations created in this course will be added to your personal portfolio (username.github.io).

1. Create a new directory in your personal portfolio repository and name it devops-presentations.
 - a. All presentations created in this course will be added to this directory
2. Create a new directory in your personal portfolio repository and name it web-430
 - a. The HTML files created in this course to host your presentations will be added to this directory
3. Link the devops-presentations to your personal portfolio's landing/home page
4. Create a new HTML page and name it <yourLastName>-tech-value-stream
5. Add the HTML page to the web-430 directory (personal portfolio repository)
6. The HTML page must include
 - a. Styling to mirror your personal portfolio
 - b. Navigation "to-and-from" your personal portfolio's landing page/home page
 - c. An HTML element for mp4 videos
7. Convert the presentation to an mp4 and reference it using the HTML <video> tag
8. Add the mp4 to your devops-presentations directory (personal portfolio repository)

Video Example:

```
<div class="card">
  <div class="card-body">
    <video controls autoplay reload="none" style="width:1000px;">
      <source src="../devops-presentations/test-presentation.mp4" type="video/mp4" />
    </video>
  </div>
</div>
```
